

MITRE ATT&CK Coverage Map

Purpose

This document identifies ATT&CK techniques covered by the SecOpsAI platform and maps them to platform detection capabilities, security controls, and monitoring functions.

Technique ID	Technique Name	Coverage	Detection Method
T1078	Valid Accounts	Authentication abuse detection	Rules + ML
T1110	Brute Force	Rate limiting and login monitoring	Rules + ML
T1190	Exploit Public-Facing Application	API security controls and monitoring	Rules
T1046	Network Service Discovery	Zeek and Suricata network monitoring	Rules + ML
T1071	Application Layer Protocol	Behavioral traffic analysis and C2 detection	Rules + ML
T1071.004	DNS Protocol	DNS tunneling detection	Rules + ML
T1021	Remote Services	Lateral movement detection	Rules + ML
T1041	Exfiltration Over C2 Channel	Slow-and-low exfiltration detection	ML
T1001	Data Obfuscation	Evasion behavior detection	ML
T154	Abuse Elevation Control Mechanism	Privilege escalation monitoring	Rules + ML
T1036	Masquerading	Behavioral anomaly detection	ML

Coverage Summary

SecOpsAI provides monitoring and detection coverage across:

- Authentication abuse
- Credential attacks
- API attacks
- Network reconnaissance
- Lateral movement
- Command and Control activity
- DNS tunneling
- Data exfiltration
- Privilege escalation
- Defense evasion
- Masquerading techniques
- Behavioral anomalies

Coverage Categories

Rules-Based Detection

- T1190
- T1046
- T1078
- T1110
- T1071
- T1071.004
- T1021
- T1548

Machine Learning Detection

- T1078
- T1110
- T1046
- T1071
- T1071.004
- T1021
- T1041
- T1001
- T1562
- T1036
- T1548

Hybrid Detection (Rules + ML)

- T1078
- T1110
- T1046
- T1071
- T1071.004
- T1021
- T1548
