

MITRE ATT&CK Coverage Map

Purpose

This document identifies ATT&CK techniques covered by the SecOpsAI platform.

Coverage Matrix

Technique ID: T1078

Technique Name: Valid Accounts

Coverage: Authentication Controls (JWT)

Technique ID: T1110

Technique Name: Brute Force

Coverage: Rate Limiting and Login Monitoring

Technique ID: T1190

Technique Name: Exploit Public-Facing Application

Coverage: API Security Controls

Technique ID: T1046

Technique Name: Network Service Scanning

Coverage: Zeek and Suricata Monitoring

Technique ID: T1071

Technique Name: Application Layer Protocol

Coverage: Traffic Analysis and Behavioral Detection

Technique ID: T1021

Technique Name: Remote Services

Coverage: Authentication and Access Control

Summary

The SecOpsAI platform provides detection and monitoring coverage across authentication abuse, network reconnaissance, remote access activity, and application level attacks.
